Regt which belongs to the infantry division in Kosico that was confirmed as the 10th Inf Div in April 1950.

Sach regiment of the division in Kosice was reportedly reduced in size to one infantry battalion and one replacement battalion in October 1949.

Therefore, the Mg 32d Inf Regt and its infantry battalion have been carried in Kosice and its replacement battalion in Trebisov.

Illowever, the present report mentioning a I Bn and a II In indicates that the regiment may have been restored to its standard organization into three infantry battalions and one replacement battalion, possibly after the arrival of recruits in October 1950. This hypothesis requires substantiation.

The recruit figures were probably exaggerated since there is no adequate barracks space in the two towns.
